CD design

Publishing your first CD will always be a life changing experience. We managed to create something that left our customer thoroughly delighted!

“ I'm really speechless - it's stunningly awesome!!!

When I wrote the credit thanking you for the beautiful design, I kind of knew it would be... but was also anticipating something I hadn't seen...and it's exceeded all my expectations beyond belief!!

So a huge thank you.

Mark Jeffreys
Musician

Airbus

We worked with Airbus SAS on their Environmental, Social & Economic Report. Our pitch beating a number of Agencies with it's innovative, 'green' design.

This even included the report being supplied in digital format on a USB stick - made from sustainably managed bamboo!

“ We worked with Samskara Design on the design and concept of our “Environmental, Social & Economic Report”. Our experience with the team was very positive as they used a lot of creative initiative and flexibility, carefully translating our expectations into excellent design work.

We have enjoyed working with Samskara Design very much and would highly recommend them.

Kathrin Meier, Environmental Affairs AIRBUS SAS

The Plastic Surgeon

Plastic Surgeon's cosmetic repair service uses fine finishing techniques, many originally used in the automotive trade, but also drawing on the skills of French polishing. Our specialist Finishers use a vast array of proprietary fillers, hardeners, polishes and colours, to mend surfaces that have suffered damage such as scratches, dents, chips, gouges or staining.

Cosmetic repair does not include structural repairs. It focuses on surfaces because these are most vulnerable to damage and everyday wear and tear. The range of surfaces and items that Plastic Surgeon can repair is vast and our cosmetic repairs save over 1,700 tonnes of damaged products from going to landfill waste every year.

National Trust

Samskara were asked to create the branding for the National Trust Gardens conference.
